BAHAMA & COLONIAL SHUTTERS

BAHAMA SHUTTERS - Providing privacy, sun control, weather protection and security, Bahama Shutters are not only functional but attractive for commercial applications such as banks, schools, and other institutions. Since traditional design is more attractive than ordinary industrial louvers, imaginative architects and engineers are continually creating fresh uses and arrangements including designing new building exteriors or refacing existing facades.

OPERATION - Shutters shall include a continuous, reversible, extruded aluminum header as a top-hinged mounting device. Shutters shall be supported by means of telescopic adjustable arms, or fixed arms with the shutter projected up to a maximum angle of 44 degrees. The arms shall connect to rod brackets on the underside of the shutter and to the existing structure. The shutters shall include arms which can be disconnected to facilitate lowering the shutter into the closed position.

COLONIAL SHUTTERS - Expertly designed and engineered to meet the requirements of the nation's toughest building codes, eye-appealing Colonial Hinged Shutters provide the durability to withstand hurricane-force winds. Installed beside windows, Colonial Hinged Shutters easily swing closed and can be locked to discourage unauthorized entry and vandalism. They are available in single and double-louvered designs.

OPERATION - Hinged shutters shall be mounted on aluminum hinged hardware to swing closed and lock securely by means of an aluminum horizontal lock bar. Shutters shall be held back in the open position with a specially hidden designed locking device.

Bahamas Aluminum Manufacturing can manufacture and install all of your colonial hinged and Bahama Shutters right here in The Bahamas. Available in 4 custom colours, specializing in standard and custom sizes. Our 2" louvers are extruded aluminum .040" thick.
